

SafeStick®

SafeStick® is used by local governments worldwide for upholding the integrity of citizens by protecting confidential stored information.

Securing portable information in a cost-effective manner is a matter of public confidence. SafeStick® can help you build public confidence.

SafeStick® can instantly secure stored information in a user-friendly way, allowing you to take information safely out of the office setting, enabling you to work from home or from any remote location.

SafeStick® ensures that your information is always protected, regardless of who ultimately is in charge of safeguarding the information.

Breaches Within industry Made Public

Mercy Medical Center

A memory stick containing sensitive patient information was found on the ground on July 18 by a local citizen at the Merced County Fairgrounds, where the hospital had set up an information booth. The memory stick was returned to the hospital four weeks later. It contained patient names, Social Security numbers, birthdates and medical records.

Benefits of choosing SafeStick®

Protect Your Sensitive Information

All stored information on SafeStick® is automatically encrypted and password protected in accordance with industry standards.

Protect Your Organization from Negative Exposure

There has unfortunately been many incidents with lost information ending up in the wrong hands.

Make People Mobile

The realities of today's mobile workforce are often overlooked. Leave the heavy laptop behind and bring your secured information home or use it remotely with SafeStick®

Comply with Legislation and Industry Standards

With the pressure mounting from new legislation on portable information, SafeStick® is the easy solution.

Government Customer Spotlight

NHS (National Health Service within the UK)

"We were impressed with SafeStick® because of the level of security it offers, as well as its ease of use and value."

East Riding of Yorkshire Council

"SafeStick® is important for our organization because the security of our data is vital."

Arvato Government Services

"The security of personal and sensitive data is of the utmost importance. That is why we use SafeStick®"

SafeStick® Technical Brief

SafeStick® requires that the correct password be entered before providing access to stored information. This means that a lost USB stick will never again cause problems.

SafeStick® is compact and robust. (9 grams, 56x18x6 mm)

About BlockMaster the maker of SafeStick®

BlockMaster® has the longest track record of delivering always-on security USB flash drives in the world. Since the first release of SafeStick® in early 2004, the solution has evolved and today excels at meeting the demands of both global enterprises and the one-man shop.

All BlockMaster® products are manufactured in accordance with global environmental initiatives such as RoHs and WEEE under ethical conditions in high-tech facilities, using high-quality components.
